

Radionomy Group 543 Howard Street, San Francisco, CA 94105

Stats Tool (for external software)

SHOUTcast offers our Streaming Service stations an additional tool to monitor their listener stats into other software programs. More than just an API, this is a complete XML reporting aggregator for your station. Use this tool to monitor your stats in automation programs like SAM Broadcaster, but remember, that your stats are always available anywhere in the world by just logging in to your SHOUTcast account too!

Instructions:

To begin, you will normally have to select the type of statistics service you are using. Please select "XML" or "ICEcast" statistics.

The program will have a place to enter the "Server" or "Host" that is providing the stats. In this field you enter:

[http://aggregator.radionomy.com/?mount=/**\[mount\]**&user=**\[email\]**&password=**\[password\]**&](http://aggregator.radionomy.com/?mount=/[mount]&user=[email]&password=[password]&)

HOWEVER, you need to modify the values in bold as follows:]

[mount] -> look up the "Mount Point" for your station. This information is found in the "Streams" tab of your RMO login.

[email] -> the email address you use to log in to rmo.shoutcast.com

[password] -> the password used to log in to rmo.shoutcast.com

The final result for your stats will look something like this:

<http://aggregator.radionomy.com/?mount=/tophits&user=joe@gmail.com&password=123456&>

Here are other things that you may need to enter into your software:

Port: 80

Check the box for Private Relay

NOTE: This tool does not currently work with Radionomy or DNAS+ stations

NOTE: Use the following substitutions for special characters in your password:

;	%3B
<	%3C
=	%3D
>	%3E

?	%3F
@	%40
_	%5F
:	%3A

SPACE	%20
!	%21
"	%22
#	%23

\$	%24
%	%25
&	%26
'	%27

(%28
)	%29
*	%2A
+	%2B

,	%2C
-	%2D
~	%7E
/	%2F
